

# NE Anthony Henday: Baseline Road interchange

## Currently under construction

- New six-lane Baseline bridge to serve traffic in both directions
- New single lane bridge to serve the eastbound to northbound loop ramp
- In May, previous eastbound bridge was demolished to make space for new larger interchange and ramps

## Traffic considerations

- Traffic is currently being detoured using the westbound bridge
- New six-lane bridge to open to traffic in late 2014, when the old westbound bridge will be demolished to make room for new loop ramp structures
- Two new traffic signals to safely manage left-hand turns onto Baseline Road at new access ramps

## Open to the public in 2016

- A new Baseline Road bridge carrying six lanes total, three lanes of traffic in each direction
- Two new loop ramps and loop ramp bridges
- Anthony Henday Drive increases from two to three lanes in each direction
