

# NE Anthony Henday: Yellowhead Trail interchange

## Currently under construction

- Detour construction for re-alignment of Anthony Henday Drive
- Piling and foundation construction for new bridges
- Upcoming demolitions of some existing bridges

## Traffic considerations

- In late August, all four lanes of Anthony Henday traffic will be redirected onto a widened southbound section
- Henday will go from divided to barrier separated traffic until construction of the northbound section is completed
- Temporary access ramps will redirect access between Henday and Yellowhead

## Open to the public in 2016

- Ten new bridges as part of a larger, safer interchange
- Includes two new two-direction flyover bridges to add a third layer of traffic
- Free flow traffic in all directions
- Henday Drive south of Yellowhead increases from two to three lanes in each direction
- New Henday Drive north of Yellowhead Trail connects to NW Henday across river
